Welcome Note

Dear Participants and Attendees,

On behalf of the UKDentalCourses Team, I extend our heartfelt gratitude for your esteemed presence at our previous Conferences and Exhibitions. Your participation has undeniably elevated the stature of this significant event, and we are deeply grateful for your support.

We are thrilled to announce our upcoming conference and exhibition, which promises to be another exceptional gathering of dental professionals and industry experts. With a renewed focus on advancing dentistry worldwide, we are committed to delivering a comprehensive program featuring renowned speakers, cutting-edge technologies, and insightful discussions.

Our distinguished lineup of speakers will share their expertise and insights into the latest technological advancements and methodologies in advanced dentistry. We are confident that this conference will serve as a platform for knowledge exchange and innovation, shaping the future of the dental profession.

We extend our sincere appreciation to our esteemed sponsors and partners, whose unwavering support has been instrumental in the success of our events. We are particularly grateful to Queen Mary University of London for their invaluable contributions to our endeavours.

Your continued participation and dedication to lifelong learning are truly commendable. We are committed to providing you with unparalleled educational experiences that will enrich your professional journey and foster meaningful connections within the dental community.

As we embark on this new chapter, we invite you to join us in shaping the future of dentistry. Your presence and engagement are integral to the success of our endeavours, and we look forward to welcoming you to our upcoming conference and exhibition.

Thank you once again for your invaluable contributions and unwavering support. Together, we will continue to advance dentistry worldwide and make a lasting impact on the field.

With warmest regards,

Ali Nankali
President
UKDC International Group

Advanced Dentistry & Innovation

Conference and Exhibition

20 November 2024

In an era where dental technology firms vigorously strive to persuade clinicians to adopt their innovative products, digital dentistry conferences have emerged as pivotal business networking platforms. Despite the global shift towards predominantly online events, these live gatherings remain essential in endorsing the integration of cutting-edge technologies into routine practice.

The UKDentalCourses (UKDC-World) organization is set to unveil another captivating Digital Dentistry Conference, accompanied by an exhibition tailored for clinicians and enthusiasts passionate about this science and its associated technology. This event serves as a prime introduction to Digital Dentistry, epitomized by the fusion of advanced dental practices with digitally driven or computer-controlled components.

While many associate digital dentistry solely with intra-oral scanners or 3D milling machines (CAD/CAM), such a view merely scratches the surface. Electronic records, seamlessly integrated into dental surgeries and institutes for over a decade, exemplify the expansive reach of this domain. Yet, a subset of dental professionals remains tentative about embracing these advancements.

This conference is dedicated to demystifying digital dentistry, offering delegates a clear understanding coupled with practical insights for integration into their practices. Renowned organizations will elucidate how practitioners can revolutionize their operations, considering financial considerations.

Participants will be introduced to the latest innovations in digital dentistry, spanning prosthodontics, endodontics, periodontology, and implantology. The exhibition hall further provides attendees with the opportunity to acquaint themselves with groundbreaking technologies, fostering dialogue and networking.

Our esteemed speakers will predominantly delve into the clinical nuances of digital dentistry and its profound implications for our professional landscape. The speakers' schedule will be finalized and disseminated ahead of the conference.

This conference seeks to equip professionals with:

A comprehensive overview of Digital Dentistry and its evolution,
An understanding of associated technologies, including scanning, designing, and printing,

Pragmatic digital methodologies for clinical scenarios,

Resources to bolster dental professionals and their teams in achieving their objectives and honing their skills.

Tailored for General Dental Practitioners (GDP), Undergraduate and Postgraduate Students, and specialized professionals and their teams, this conference aspires to underscore the transformative impact of digital dentistry on healthcare services. This year, we emphasize the clinical ramifications of various devices on treatment

paradigms. Recognizing the current global landscape, we offer both in-person attendance and a virtual option for those hindered by travel constraints. Those present will have the privilege of engaging with renowned speakers and exploring our exhibition, with stalwarts showcasing their latest innovations. Advanced session bookings promise hands-on experiences with state-of-the-art devices.

Although tickets are requisite for participation, we've ensured their pricing remains nominal, offering a spectrum of options for affordability.

By the conference's culmination, delegates will possess enhanced digital dentistry acumen, comprehending the merits and limitations of various technologies. They'll gain insights into scanning, designing, digital impressions, and system evaluations, while also exploring the intricacies of contemporary digital systems, software, protocols, and diagnostics.

It's conceivable that in the not-too-distant future, bypassing digital dentistry will be an anomaly. We foresee a meteoric rise in technology adoption, driven by its remarkable results. Hence, our unyielding advocacy for professionals, especially the emerging generation, to immerse themselves in this realm, leveraging platforms like conferences and exhibitions to stay abreast of market novelties.

Continuing Professional Development Certificates (CPD) will be provided.

A, B, C, and D = GDC development outcomes

Dr Ali Nankali

UKDC Founder

Dr. Nankali boasts 37 years of experience in participating in and organising conferences across various countries. He became acquainted with digitalization in the industry in 1988 and has since been actively involved in developing digital systems.

We are confident that his involvement in this conference as a speaker and chairperson would greatly benefit the event.

Ali Nankali

Presentation title:

The Impact of AI on Clinical and Practice Management in Dentistry

Biography:

Clinical Reader in Digital Dentistry | Founder of UKDC-Group | AI-in-Education Advocate

Ali Nankali is a Clinical Reader in Digital Dentistry at Queen Mary University of London. With over two decades of academic and clinical experience, he is internationally recognised for integrating artificial intelligence and digital technologies into dental education and practice.

He is the Founder and President of UKDC International and the architect behind Evalentra, an innovative AI-supported educational platform. Dr Nankali regularly speaks at international conferences, publishes on digital innovation in healthcare, and actively supports AI literacy across the dental team.

Bevin Mahon

Presentation title:

Implementing Digital Dentures:
Lessons from Our Clinical Evolution

Biography:

Bevin Mahon AIBF President

Owner & CEO at Dentaltech Group | Transforming How Oral Healthcare is Accessed/Delivered | Key Opinion Leader | Award-Winning Entrepreneur & Mentor | Board Member | Wife and Mum of 3 wonderful young adults!

Bevin Mahon is the CEO and Owner of Dentaltech Group, a multi-award-winning, second-generation dental company leading the way in digital dental innovation. Under her leadership, the business has undergone a complete transformation—from traditional denture manufacturing to fully digital workflows using scanning, CAD design, and 3D printing for everything from dentures and smile makeovers to anti-snoring devices and removable veneers.

Cathy Padmore

Presentation title:

Short & Extra Short Implants as a Minimally Invasive Solution

Biography:

Bsc Hons degree in Animal Science from University of Reading in 1998, starting career as laboratory technician in animal reproductive technology. Progressed to pharmaceutical industry in medical sales, training and business development. Specialised in Neurology & Neurosurgery before moving to Dental Implant sales in 2015. Specialised in Regenerative technologies, and GBR, GTR remains special area of interest. Joined BTI Biotechnology in 2019 as General Manager for UK & Ireland subsidiary.

Presentation synopsis/overview:

Will present BTI Implant Extraction System, explaining how this system enables atraumatic, minimally invasive extraction of a wide range of dental implants. Will present the kit and components and correct extraction technique.

Key learning aims and objectives:

Aims & Objectives;

1. Provide information about BTI Implant Extraction System
2. Discuss the importance of minimally invasive implant extraction and preservation of the site
3. Present the correct technique for implant extraction with BTI Extraction System

Learning Outcomes;

1. Learn about the BTI Implant Extraction Kit and components
2. Understand why atraumatic implant extraction is important and how it is achieved with BTI Implant Extraction System
3. Learn the correct technique for using BTI Implant Extraction System

Preferred contact details Email address:

Cathy.padmore@bti-implant.co.uk

Don Babbs

Presentation title:

Make Your Own Crowns

Biography:

Don Babbs has a long history in a very wide range of technologies. Qualified in Aeronautics and Astronautics spent ten years in the aerospace industry before moving to computing and software. He lived in Italy for 13 years where his own company developed CAD/CAM software and was floated on the London AIM market in 1998 where he remained CEO for 12 years. He set up Awesome Technology in 2011 as a response to a lack of development in the dentistry sector and has been at the forefront of innovation ever since.

Helen Kaney

Presentation title:

AI in dentistry - an indemnity perspective.

Aims

At the end of the session, attendees will understand how AI is currently being used in dentistry in the UK, and understand the perspective of an indemnity organisation, the role of which is to help members to understand and reduce their risks within clinical practice.

Learning Outcomes

At the end of this presentation, and after a period of reflection and possible self-directed study, delegates should:

1. Have an understanding of the current use of AI in UK dentistry and how this might evolve
2. Understand issues around the fast-evolving area of AI, what the likely current and possible future risks are, and how to take steps to mitigate those risks to protect patients, and to avoid negligence claims and regulatory involvement

GDC Development Outcomes A, C and D

Biography:

Deputy Head of Dental Division, MDDUS

BDS LLB Dip LP MBA FCGDent

Helen qualified from Glasgow University in 1987 (BDS) and spent many years in general dental practice as well as working as a clinical assistant in conservative dentistry and prosthodontics at Glasgow Dental Hospital and at Guy's Hospital in London.

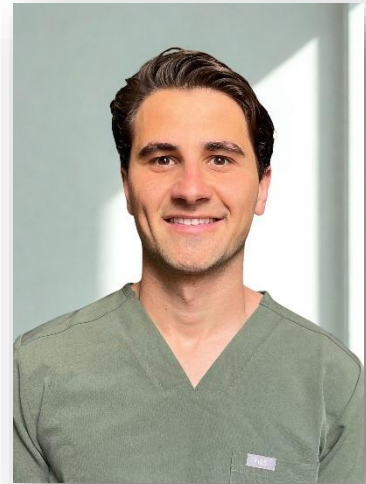

She developed an interest in law and ethics early in her career and studied law (LLB) and then trained and worked as a solicitor for a number of years, acting for doctors and dentists in clinical negligence claims, regulatory matters and FAIs (in Scotland) on the instructions of UK indemnity providers. Her first dentolegal role in 1999 was working for a large insurer in Surrey.

Helen then completed an MBA in 2013 at Strathclyde Business School. She has significant experience in advising and assisting dentists in the UK and Ireland and in several international jurisdictions. Helen was a Fellow and an elected council member of the College of General Dentistry (formerly FGDP (UK)) for 6 years until Spring 2025. She joined MDDUS in July 2023 after working for 14 years for another UK based indemnity provider, latterly as Head of Dental Services, Scotland.

Mark Joseph

Presentation title:

Vvardis Curodont Repair – Peptide technology for early caries treatment

Biography:

Dr Mark Joseph is a UK-based dentist. After graduating in Dentistry from the University of Dundee in 2019, he has gained clinical experience across both NHS and private practice in different regions of the country.

In his role as Clinical Advisor and Trainer for vVardis, Mark supports the integration of Curodont Repair into dental practice, helping clinicians adopt innovative, non-invasive approaches to the management of early carious lesions. He has spoken internationally on the use of peptide technology in early caries management and has aided with the roll out of Curodont Repair across some of the largest dental groups in the UK and Europe.

Paula Reid

Presentation title:

Haleon's Role in Advancing Oral Healthcare Innovation

Biography:

Employed with Haleon/GSK for 22 years supporting the dental industry.

Currently Working with QMUL, KINGS, CARDIFF & BRISTOL, supporting students throughout their studies, delivering modules on dental therapy areas. Provide materials and samples for patient use.

Haleon attend both national and international events, providing Key external experts to deliver on topical subjects.

Lifong Zou

Presentation title:

The application of dual-modality imaging in dentistry.

Biography:

Lifong has extensive knowledge in dimensional metrology and the wealth experience in life surface image capturing, analysis and measurement; particularly related to clinical applications, such as human teeth, face, body and prosthesis of human body parts. Lately her expertise was extended to the standardisation of life surface measurements with BSI (British Standard Institute) and ISO (International Standard Organisation). Lifong has always been motivated to find new application if it is beneficial to human health. She has developed and governed the 3D imaging unit over two decades, and kept the measurements delivery in a high standard. Being graduated in the University Aeronautics and Astronautics, Lifong has transferred her knowledge in engineering and physics to dentistry and medicine, in that, she found it is extremely interesting.

Exhibition

This section will be updated once more information becomes available.

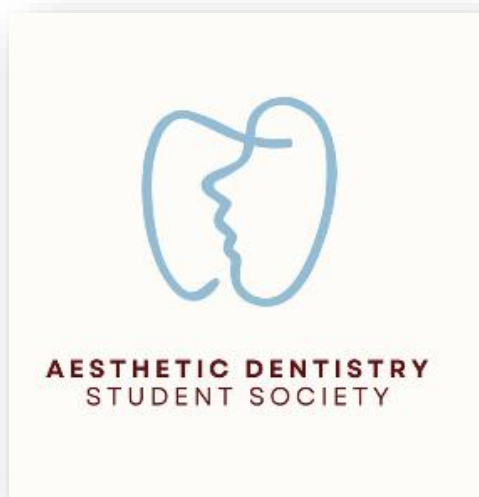

**Aesthetic Dentistry
Student Society**

ADSS

Aesthetic Dentistry Student Society

Welcome to ADSS, the Aesthetic Dentistry Student Society, an inter-university group with a shared passion and interest in aesthetic dentistry.

The ADSS is your gateway to learning about aesthetic techniques, from smile design to facial aesthetics, and our team is dedicated to enhancing student learning in this ever-evolving field, and we've got some exciting events planned, from workshops and talks to podcasts and even a conference!

Awesome Technology EU

Awesome Technology was formed by a group of engineers with aerospace, automotive and metrology experience before defining and successfully writing engineering software that is sold and supported worldwide.

With the arrival of newer technologies such as 3D printing, precision scanners and laser applications Awesome Technology set about utilising and writing software that would integrate technologies and industrial processes. For example, despite the substantial advances in the automation of engineering processes the dentistry and orthodontic sector has remained a largely manual solution for highly skilled personnel.

With the ever-increasing accuracy of both intraoral scanners and 3D printers, such as the Shining 3D Aoralscan and DWS range, these products allow dentists to capture, then design using specialised CAD/CAM software and finally print crowns within minutes. As such, costs and time frames are significantly reduced. Awesome Technology also offers full training on all products from our experienced team and provides ongoing assistance for end users.

Using personal scanners to capture the mouth model and software to design changes or additions to it, bridges, caps etc can be produced by an on site 3D printer. The costs of such an automated procedure are reduced substantially and the patient treatment can be completed in a day instead of over weeks.

This is just one example of where Awesome Technology's expertise can be used to provide advantages for both the system operator and end user.

The company is based near Cheltenham in Gloucestershire and supplies customers across three continents.

Contact: Awesome Technology, Unit 3-4 Whitworth Court, Baird Road, Waterwells, Quedgeley, Gloucester, GL2 2DG

Tel: 01242 370453

<https://www.awesometechnology.eu/>

BTI Biotechnology Institute

(Of which BTI Biotechnology UK Ltd. Is a subsidiary).

BTI Biotechnology Institute is a multinational company based in Vitoria, Spain. BTI specialises in biomedicine whose activity focuses on three areas of work: Oral Implantology, Regenerative Medicine and Sleep apnoea.

Established in 1995, BTI offers one of the most versatile implant systems available, including short, extra short, and our new CORE tapered implants. Our UnicCa® surface demonstrates impressive blood clot affinity, and the severe atrophic mandible & maxilla can be restored with confidence and predictability.

BTI prosthetic options allow restoration of the most demanding cases with results that are maintained overtime through a combination of the 'BioBlock®' solution, absorbing lateral forces, ensuring implant connection hermeticism, and obtaining impressive tissue sealing.

BTI is a world leader in regenerative medicine as a result of the development and patenting of PRGF® Endoret®.

BTI offers a Universal Implant Extraction System, compatible with over 35 implant brands. This system allows predictable, minimally invasive extraction of implants, preserving the bone bed and allowing retreatment.

Cassiopeia Globals Ltd

Cassiopeia Globals Ltd. is an UK-based, family-run business specialising in the supply of high-quality, affordable surgical and dental instruments.

The meaning of our name is as follows, since Cassiopeia is one of the most recognisable constellations in the northern sky with its distinctive W/M shape. We similarly aim for our brand and our products to be instantly recognisable for their quality, affordability, and reliability. Constellations not only look pretty in the sky but they also serve as a guide, so we strive to guide all healthcare professionals to equipment they know they can trust and rely on.

Cassiopeia Globals was founded after recognising a big problem in the industry; many professionals are forced to spend huge amounts on overpriced equipment, while the only lower-cost options available compromise on quality. We also recognise how challenging it is for students, starting out in their careers, to invest in quality equipment while managing all their other expenses. So by offering affordable and high-quality instruments we help to ensure that funding can be better spent where it truly matters such as supporting our healthcare workers and in patient care too.

DentaleLibrary

Empowering Dental Professionals through Online Publishing

Welcome to [DentaleLibrary](#), an online accessible library dedicated to dental students, clinicians, and professionals. We are revolutionizing the publishing industry with our fresh approach and unbeatable prices. Discover why DentaleLibrary is the ultimate platform for students, companies, and researchers to showcase their work and make a lasting impact on the dental community.

Our Mission:

Improving Health and Lives

At DentaleLibrary, our mission is to empower dental students, clinicians, and professionals to publish their papers, articles, and research results. By facilitating the dissemination of knowledge, we contribute to the continuous improvement of healthcare and the well-being of our society. We believe that by enabling health professionals to develop and share their skills, we can collectively provide better healthcare services.

Collaborative Learning Environment

We have fostered a vibrant and collaborative learning environment by working closely with professionals, health groups, speakers, and organizations. By creating partnerships and connections within the healthcare community, DentaleLibrary has become a hub for knowledge exchange and innovation. Whether you are a student seeking valuable insights or a seasoned professional looking to share your expertise, DentaleLibrary provides the ideal platform for collaboration and growth.

A Unique Hub for Professionals and Enthusiasts

DentaleLibrary offers a unique space where professionals and enthusiasts alike can find their needs met. As an open online accessible library, we provide a vast array of dental seminars, events, and research articles. Whether you are

searching for the latest advancements in dental technology or seeking inspiration for your own research, DentaleLibrary offers a comprehensive collection that caters to your interests.

Seamless Accessibility and User Experience

We understand the importance of accessibility and user experience in today's digital world. DentaleLibrary provides a user-friendly platform that ensures easy navigation, quick access to resources, and efficient publication processes. We value your feedback and continuously strive to improve our platform based on your suggestions and needs. Together, we can shape DentaleLibrary into an even more exceptional resource for the dental community.

Join DentaleLibrary Today

Don't miss the opportunity to be part of the DentaleLibrary community. Whether you are a student looking to publish your research, a company seeking visibility, or a researcher eager to share your findings, DentaleLibrary is the perfect platform for you. Our unbeatable prices and commitment to excellence set us apart from traditional publishing organizations. Experience the convenience, affordability, and impact of publishing with DentaleLibrary.

Visit our stand at the dental conference to learn more about DentaleLibrary and how we can support your publishing needs. We look forward to welcoming you into our community of dental professionals who are passionate about advancing oral health and making a difference.

DentalOnlineWorld

Connecting Professionals and Empowering the Dental Community

Welcome to [DentalOnlineWorld](#), the inclusive platform designed for everyone in the dental field. We are committed to improving the health and lives of individuals by fostering communication and collaboration among professionals and societies. With a growing community of dedicated followers, DentalOnlineWorld has become the go-to resource for dental knowledge and engagement.

Our Mission:

Enhancing Healthcare through Collaboration

At DentalOnlineWorld, our mission is to empower both individuals and professionals to contribute to the betterment of healthcare in our society. By facilitating the development of skills and fostering collaboration among health professionals, we strive to elevate the standard of care and promote oral health. Together, we can create a healthier future.

A Community of Professionals and Enthusiasts

DentalOnlineWorld is a unique platform that brings together a diverse community of dental professionals, societies, and individuals. Whether you are a seasoned practitioner, a student seeking guidance, or an enthusiast passionate about oral health, DentalOnlineWorld provides a space where you can connect, learn, and grow. By facilitating communication between professionals and societies, we enable the sharing of knowledge and experiences that contribute to professional development and improved patient care.

An Efficient Learning Environment

We have fostered an efficient and effective learning environment by collaborating with professionals, health groups, speakers, and organizations. Through these partnerships, DentalOnlineWorld has become a hub of dental knowledge, seminars, and events. Our platform serves as a single source where you can access valuable resources, stay informed about the latest advancements, and engage in discussions with like-minded professionals. Together, we can advance our understanding and practice of dentistry.

Your Feedback Matters

At DentalOnlineWorld, we believe in continuous improvement. We value your feedback and actively seek input from our community to enhance our platform. Your suggestions and ideas guide us in making DentalOnlineWorld an even more valuable resource for the dental community. We encourage you to share your thoughts and contribute to shaping the future of DentalOnlineWorld.

Join DentalOnlineWorld Today

Don't miss the opportunity to be part of the DentalOnlineWorld community. Whether you are seeking professional connections, educational resources, or a platform to share your expertise, DentalOnlineWorld welcomes you. Our platform is designed to meet the needs of all dental professionals and enthusiasts, providing a space where you can connect, learn, and thrive.

Visit our stand at the dental conference to learn more about [DentalOnlineWorld](https://www.onlinedentalworld.com/) and how we can support your professional growth and networking. Together, let's elevate the dental community and drive positive change in oral healthcare.

MDDUS

MDDUS can be your trusted ally

MDDUS is a mutual defence organisation, offering expert dental-legal advice, support, and professional indemnity to dentists and dental professionals across the UK.

Alongside expert legal advice, we offer support, encouragement, and understanding at every step of your career. We never triage our calls and have a dentist-for-dentist approach meaning you will always be supported by a fellow dentist.

We can be your trusted ally and be on your side with dento-legal support that's actually useful, actually human, and from dentists who've been where you are now.

Benefits of membership include:

- Real-time help with emerging concerns
- Always speak to a dentist – every time, any time
- Expert guidance delivered with empathy and understanding
- Proactive risk management
- Elective treatment covered as standard
- Facial aesthetics cover included*

*Provided you have graduated, are in your second year of practice and your gross annual income from such work does not exceed £15,000.

Our student memberships is FREE and you can apply [online](#).

Please make sure to visit our stand during the conference to learn more about MDDUS and to get a quote for membership.

Haleon UK

Introduction to Haleon

- 
- ▶ Haleon is a multinational health company that brings together deep human understanding and trusted science.
 - ▶ We have teams of Account Relationship Managers and Healthcare Professional Consultants covering the whole United Kingdom dedicated to dental professionals
 - ▶ Haleon takes sustainability seriously, and is engaged in programmes to help reduce environmental impacts and improve access to healthcare and health knowledge
 - ▶ Our oral health range include products to help support patients

Life Support

UKDC Life Support: CPR Course for Dental Professionals

Welcome to UKDentalCourses' division, UKDC Life Support. We're steadfast in our mission to equip dental professionals with crucial life support and CPR training. As emergencies can occur without warning, it's imperative that the entire dental team is adept at handling such situations. Join us to see firsthand the benefits our CPR course can bestow upon you and your staff.

Why Attend the CPR Course?

Resuscitation Council (UK)

Recommended Training: The CPR training for dental teams is highly recommended by the Resuscitation Council (UK). It highlights the obligation of each dental team member to possess resuscitation skills in the event of a cardiorespiratory arrest.

Meeting Quality Standards: We provide the required Quality Standards and supporting information for cardiopulmonary resuscitation practice. Our courses are designed to train dentists and their teams, ensuring proficiency at a level appropriate to each individual's expected role.

Early Recognition and Response: The core standards of our CPR course emphasize the early recognition of deteriorating patients and the establishment of an effective system to summon help, thus preventing cardiorespiratory arrest.

Immediate Action: Our course emphasizes the prompt recognition of cardiorespiratory arrest and the immediate initiation of cardiopulmonary resuscitation (CPR). We equip dental professionals with the skills needed to respond swiftly and effectively in emergency situations.

Defibrillation and Post-CPR Care: We emphasize the importance of attempting defibrillation within three minutes of identifying cardiorespiratory arrest. Furthermore, we provide guidance on appropriate post-cardiorespiratory-arrest care for successfully resuscitated individuals, including safe transfer protocols.

Continuous Improvement: We have established processes to measure the implementation of standards continually. This ensures that any identified

problems are promptly addressed. Our commitment to ongoing training and updates in CPR, based on expected roles, helps dental teams stay up-to-date and confident in their life-saving skills.

Regulatory Compliance: According to the General Dental Council (GDC), dental practitioners and healthcare staff should update their knowledge and skills in resuscitation at least annually. By attending our CPR course, you demonstrate your dedication to meeting professional regulatory requirements.

Your Training Options: Tailored to Your Needs

At UKDentalCourses, we recognize the diverse needs of our clientele. Thus, we've devised multiple training structures to accommodate everyone:

Conventional Training (At Your Place): A full, in-person training session conducted at your location. This training is suitable for groups, and we offer various pricing structures based on the number of attendees. We also have special offers for those looking to book multiple courses.

Hybrid Training: Embracing the best of both worlds, our hybrid training combines in-person practical sessions with online theory components. We provide two distinct settings for the hybrid model:

At Your Surgery: Designed for groups, with prices structured based on the number of participants.

At Our Center: Suitable for individuals and groups. Group prices decrease per person as the group size increases. Again, there are special offers for those keen on multiple course bookings.

Our competitive price points ensure that you're obtaining top-tier training at great value. For larger groups or bespoke requirements, please get in touch, and we'll craft a custom package just for you.

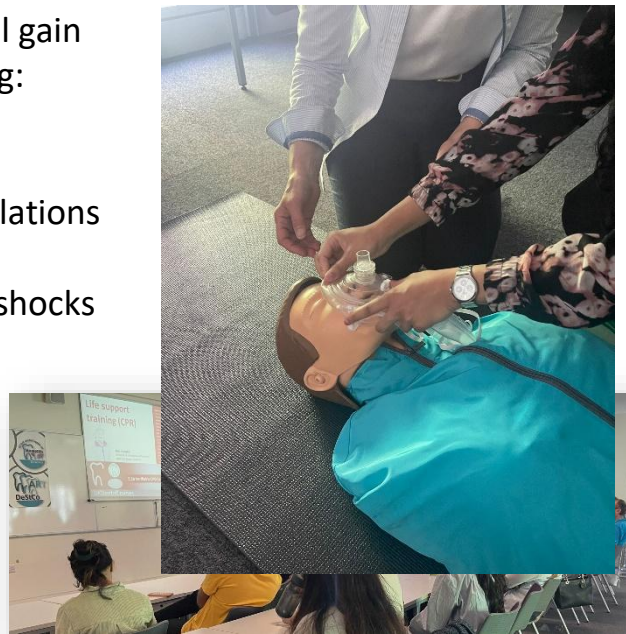

VIP Privileges: Opting for instalment payments grants you VIP status, which comes bundled with complementary access to a selection of our premium online courses such as "Safeguarding" and "Diversity and Inclusion".

All-Around UK Presence: Whether you're in the north, south, east, or west, UKDentalCourses has got you covered. We take pride in our expansive reach, ensuring that dental professionals all over the UK can easily access our top-quality training.

Learning Outcomes:

During our CPR course, participants will gain valuable knowledge and skills, including:

- The role of the first aider
- Priorities of treatment
- Health and safety rules and regulations
- Risk assessments
- First aid for injuries, illness, and shocks
- The recovery position.
- Cardiopulmonary resuscitation (CPR)
- Revision on emergency drugs commonly occurring dental emergencies and devices.
- First aid for special circumstances
- Assessing an incident
- Gaining confidence through practical scenarios such as choking, panic attacks, and anaphylactic shock
- Effective communication with the team and patients
- Casualty care
- Applying the ABCDE approach to assess and treat acutely ill patients.
- Knowledge of available emergency drugs and their application in different medical emergencies
- Recognizing signs and symptoms of various medical emergencies.
- Understanding how to treat and manage common medical emergencies.
- Performing CPR when and where required

Flexible Locations:

Our versatility is our strength. Depending on your preference, we can either bring our CPR courses to your practice or welcome you at our specialized training facility.

Suited for All Dental Professionals:

Our CPR course is designed to benefit all members of the dental team, including dental students. By attending as a team, you can foster a cohesive and prepared approach to medical emergencies in your practice.

CPD Course Hours:

Our CPR course provides 5.5 hours of verifiable CPD, contributing to your ongoing professional development. Meeting the CPD requirements demonstrates your commitment to staying up-to-date and enhancing your skills.

Long-Term Contracts:

At UKDentalCourses, we value long-term partnerships. We are pleased to offer contracts for ongoing training with organizations, institutes, and individuals. By

establishing a lasting relationship with us, you can ensure continuous professional development for your team.

Join UKDC Life Support for the CPR Course:

Choose UKDentalCourses' UKDC Life Support for comprehensive CPR training tailored to the needs of dental professionals. Benefit from our extensive experience, dedicated team, and competitive edge. With a track record of 100% satisfactory feedback, we are confident in delivering exceptional training that will empower your team to save lives.

Contact us today to discuss your training requirements and secure your place in our upcoming CPR course. Together, let's enhance the preparedness and effectiveness of dental professionals in medical emergencies.

UKDC-World

Discover the World of UKDentalCourses:
Your Path to Professional Excellence!

Welcome to [UKDentalCourses](#), where the journey to professional growth and success begins. As we proudly celebrate our 3rd International Conference, we reflect on the incredible transformation that has shaped us into a global educational powerhouse. Our commitment to providing missing professional courses, driven by your requests, has paved the way for a remarkable evolution.

From Local to International Impact:

What began as a local initiative to fill educational gaps in 2019 has now blossomed into an international phenomenon. Thanks to your unwavering support, we have expanded our horizons, reaching communities, societies, and institutes worldwide. Today, we stand tall, having served thousands of professionals both within the UK and across the globe, a testament to the trust you place in us.

Diverse Speakers, Endless Expertise:

At UKDentalCourses, we take immense pride in our distinguished speakers who represent a myriad of dental fields. Their profound knowledge and expertise form the backbone of our organization, ensuring that you receive nothing less than excellence in every aspect of dentistry. From the latest advancements to timeless techniques, our courses are designed to enrich your knowledge and elevate your practice.

Your Success Is Our Sole Focus:

As a purely educational organization, your growth and success are at the heart of our mission. We are devoted to empowering you with the skills and knowledge needed to elevate healthcare services, not only in the UK but also around the world. We cherish the impact our actions and services have on your professional journey, and it fuels our dedication to go above and beyond.

Welcome to UKDC-World:

The recognition from professionals far and wide has led us to be known as UKDC-World. We wear this title with immense pride, a symbol of our collective

achievements and the global impact we have made together. It is a testament to the exceptional community we have built, one that cherishes growth, embraces diversity, and fosters continuous learning.

Let's Forge a Path Together:

At UKDentalCourses, we believe in the power of collaboration and the potential it unlocks. Let us know your aspirations, your needs, and your desires for improvement in your educational environment. We are here to listen and to act. From hands-on courses to interactive online sessions, from vibrant events and conferences to strategic promotional services, we offer a comprehensive range of opportunities to enrich your professional journey.

Our Team Awaits Your Call:

Contact us today, and let our dedicated teamwork with you to craft a personalized educational experience that meets your unique requirements. Your success is our motivation, and together, we can achieve new heights in the world of dentistry.

Visit our website at <https://www.ukdentalcourses.com/> to explore our course offerings, read testimonials from our satisfied participants, and discover the vast world of possibilities that await you. Your journey to professional excellence starts here, with UKDentalCourses. We can't wait to embark on this extraordinary adventure together!

UKLoupes

UKloupes have been selling loupes to professionals for over a decade. We pride ourselves on our high quality, bespoke and affordable loupes. We have been market leaders in providing innovative optics and exceptional customer service for many years.

Originally founded by dental students for dental students, UKloupes quickly built a strong reputation for durable, affordable loupes and efficient response and dispatch times. Today UKloupes supplies loupes to range of professions on a global scale. We aim for 100% customer satisfaction and rely heavily on recommendations. Our reputation is built on recommendations, and we go the extra mile to ensure this.

What makes UKloupes different from other loupes companies? UKloupes provides a personal customer experience which ends with the customer receiving a pair of custom-made loupes which they can rely on. From the early stages on interaction, we make sure the correct measurements are taken and take time to fully understand the customers' needs.

Unlike other companies we offer a risk-free trial period, we welcome adjustments and modifications if required and strive to be among the best international loupes providers.

Ultradent company bio

Creating Smiles for Over 45 Years!

Our mission here at Ultradent Products is to Improve Oral Health Globally through science, creativity, and education. We strive to provide clinicians with progressive and trustworthy solutions while always respecting the patient and promoting their well-being.

Our Core Values of Integrity, Care, Quality, Innovation, and Hard Work influence every decision we make and every product we create. It is these Core Values and our focus on continuous improvement that has helped us grow into the global dental supply and manufacturing company we are today.

ABOUT ULTRADENT PRODUCTS

In 1976, after graduating from Loma Linda University and beginning his own practice, Dr. Dan Fischer invented his groundbreaking Astringedent™ management product that achieved more rapid, profound hemostasis.

Astringedent hemostatic with the Metal Dento-Infusor™ tip and Ultrapak™ cord became the backbone of Ultradent's chemical tissue management system. For the first time, clinicians could quickly and predictably achieve profound hemostasis. The success of Astringedent hemostatic fueled Dr. Fischer's desire to continue developing innovative, advanced solutions — leading to the founding of Ultradent Products, Inc. Now, marking its 45th year as a family owned, international dental supply and manufacturing company, Ultradent has continued its vision to improve oral health globally by creating better dental products that continue to set new industry standards. Dr. Fischer has numerous patents to his name.

Ultradent currently researches, designs, manufactures, and distributes more than 500 materials, devices, and instruments used by dentists around the world. This includes its renowned, industry-leading Opalescence™ Tooth Whitening System, and the groundbreaking Opalescence Go™ professional take-home whitening system. Ultradent's product family also includes the award-winning VALO™ LED curing light, UltraSeal XT™ hydro pit and fissure sealant, and Ultra-Etch™ etchant.

YourOnlineCPD

A Nexus of Expertise and Learning

At YourOnlineCPD, we have carved out a niche in providing specialized resources tailored to the unique needs of diverse professionals. Our clientele is as varied as it is vast, encompassing educators, comprehensive medical teams—including doctors and nurses—and the entire gamut of the healthcare sector. While our scope is broad, we're particularly proud of our dedicated provisions for dental practitioners and their allied teams.

Your Premier Hub for Expertise

Whether you're a Dentist, Medic, part of their crucial support teams, or engaged in the world of academia as a Lecturer, Teacher, or Tutor, YourOnlineCPD is your hub. We've created a space where the brightest minds converge to share knowledge, expertise, and the latest in professional advancements.

Committed to Excellence

Our paramount aim is the holistic development of professionals. We believe in enhancing both knowledge and practical skills, creating a ripple effect that strengthens societies and bolsters the entire healthcare sector. At the heart of our endeavour is our esteemed ensemble of dental professionals. Each instructor is a paragon in their field, chosen for their depth of expertise and breadth of experience. Their commitment is to deliver unparalleled learning experiences that cater to both greenhorns and veterans in the dental and medical arena.

A Future Teeming with Opportunities

We're in an exhilarating phase, ardently crafting a slew of courses tailored to your needs. Imminently, a myriad of new courses will be unveiled, enabling you to delve into insightful videos curated by seasoned professionals. What's even more enticing? Upon course completion, you'll be able to seamlessly procure your certificate, facilitating your professional growth at a pace that suits you.

Join Us on This Journey

We cordially invite you to explore the world of YourOnlineCPD, acquaint yourself with our distinguished team, and embark on an enlightening educational odyssey.

Vvardis

Dr. Haley Abivardi, DMD, and Dr. Goly Abivardi, DMD, are internationally renowned Swiss dentists and innovators. They have dedicated their lives to advancing dentistry and making a positive impact on the oral health of the population, including those in need. They are the CEOs and founders of vVARDIS.

OUR VISION

Improving oral health, and through this the overall health of people around the world. Save teeth, save lives.

OUR MISSION

Creating a world where caries treatment is pain-free, regenerative and accessible to all.

A Heartfelt Thank You to Our Partners and Contributors:

At UKDentalCourses, we believe in the power of collaboration and recognize the invaluable contributions of those who have played a pivotal role in making our conference and exhibition a resounding success. We extend our deepest gratitude and appreciation to the following individuals and organizations:

The Speakers: Your expertise, insights, and captivating presentations have enlightened and inspired our attendees, fostering a rich learning environment and igniting a passion for advanced dentistry.

Participating Organizations in the Exhibition: Your presence has added vibrancy and diversity to our event, showcasing cutting-edge products, services, and innovations that have captured the imagination of our attendees.

Chairpersons: Your exceptional leadership and guidance throughout the conference have ensured a seamless flow of knowledge exchange and created a dynamic platform for fruitful discussions.

Dental-Tribunal: Your support and engagement have been instrumental in raising awareness about our conference, attracting a wide range of dental professionals, and fostering an atmosphere of collaboration and growth.

Queen Mary University of London (QMUL) and QMUL (Barts and the London) Dental Students: We extend our heartfelt appreciation for your unwavering support, assistance, and contributions in organizing this remarkable event. Your dedication and enthusiasm have made this conference truly exceptional.

It is through the collective efforts of these esteemed partners and contributors that we have been able to create an unparalleled educational experience for our attendees. Your commitment to advancing the field of dentistry and your belief in our vision have been instrumental in shaping the success of our conference and exhibition.

We are immensely grateful for your unwavering support, and we look forward to future collaborations and continued growth together.

With deepest appreciation,
UKDC-World Team
